BORDERS

This geranium gives you the season long good looks of bigroot geranium with an added bonus of fragrant foliage. I like the dainty, soft pink flowers that bloom in my garden from summer to frost; and the glossy green foliage that turns bronze and scarlet in fall is an added bonus! Grow in average, well-drained soil in full sun to part shade. Ideally planted in the border garden, rock garden, used in mass plantings, as a groundcover or edging along paths and walkways. This perennial is virtually disease and pest free, and attracts butterflies to the garden. Long lived, versatile, and undemanding characteristics make this geranium a favorite in my summer garden! Feed with a liquid or slow release fertilizer. This plant is hardy in Zone 4.
