### PURPLE CONEFLOWER

FULL SUN TO  
PART SUN

HEIGHT  
18-24"

SPREAD  
18-24"

CUT  
FLOWER

ATTRACTS  
BUTTERFLIES

EDGING AND  
BORDERS

The shorter height and clearer flowers blend nicely in both small and large gardens. I like using coneflowers for the year-round appeal, and this one allows me to do so on a smaller scale. Rough, lance-shaped foliage displays traditional, clear-pink flowers with a distinctive, raised cone in the center in July-August. Cones will last through the winter, or can be cut and dried and used in floral arrangements. Plant in rich, well-drained soil in full sun to part sun. Ideal for the border, rock and meadow garden, or used in mass plantings, and as edging along paths and walkways. I find that this perennial makes a superb cut flower and is one of the best for attracting butterflies. Feed with a liquid or slow release fertilizer. This plant is hardy in Zone 3.
