AROMATIC  
FOLIAGE

The sky blue flowers and reblooming nature make this a must-have salvia for my garden and yours. Neat, low clumps of aromatic, gray-green foliage display edible, sky-blue, spike-like flowers in June-July. This perennial is lovely when planted among roses, and is ideally located in the perennial border or cottage garden. The blooms make excellent cut flowers, they attract butterflies, and are long lasting - even adding color to the fall garden. Grow in average, well-drained soil in full sun to part sun. Feed with a liquid or slow release fertilizer. This plant is hardy in zone 4.
