I like the outstanding flower display and repeat bloom this plant provides in the garden. Dwarf plant with gray-green, upright, clump-forming foliage and abundant clusters of flower spikes in rich, violet-blue, in May-June, that resemble candles! This perennial attracts butterflies and is an excellent addition to the sunny, mixed perennial border or the rock, cottage and meadow garden. Remove spent flowers for repeat blooms. Grow in rich, well-drained soil in full sun to part shade. Feed with a liquid or slow release fertilizer. This plant is hardy in zone 4.
