WOODLAND
GARDEN

I like to plant astilbes for added color and foliage texture in the shade garden. Visions in Pink blooms from July to August with showy panicles of pale pink flowers. The graceful blooms are superb in cut or dried flower arrangements. Combine the glossy, dark green foliage of astilbes with hostas and ferns for a striking garden display along streams and ponds, in the perennial border, or woodland garden. The clump forming growth habit is suitable for use as edging or in containers. Grow astilbes in part shade to part sun in rich, well-drained soil. Hardy in Zones 4-9.
