(hu'ker-a)
HYBRID CORAL BELLS

PART SUN TO PART SHADE | HEIGHT 24" | SPREAD 27" | BEDS & BORDERS | CUT FLOWER | GREAT FOR POTS

I am a fan and collector of the new fancy leaved coral bells. Raspberry Ice is a fancy leaved variety with pewter gray-green leaves and raspberry veining. The ruffled, heart-shaped leaves feature wiry stems with small, delicate bell-shaped flowers that bloom in June to July in a two-tone pink color. This perennial was bred to grow well in cold and to take the dry, summer heat. It is ideally planted in the perennial border or used as edging along paths and walkways. It forms neat mounds in the rock garden or woodland garden. Plant it with annuals in decorative containers as a foliage accent. Grow it in part sun to part shade in rich, well-drained soil. It is hardy in Zones 4-9.
