FALSE SPIREA

PART SHADE	HEIGHT 12-18″	SPREAD 18-24″	WOODLAND GARDEN	BORDER GARDEN	CUT OR DRIED FLOWER

The name says it all - bright and showy. The full, flamingo-pink flowers are sure to brighten any shady spot in your yard. The slightly fragrant flowers appear in June through July atop glossy green foliage. Grow in rich, moist soil in part shade. The striking panicles of flowers are lovely planted along streams and ponds, or in masses in a woodland setting. It is also one of the most popular, and one of my favorite perennials, for the shady border garden. The graceful blooms are superb in cut or dried flower arrangements. Feed with a liquid or slow release fertilizer. This plant is hardy in Zone 4.
