(ek-i-na'se-a)

PRAIRIE SPLENDOR™ CONEFLOWER

FULL SUN TO PART SUN | HEIGHT 24" | SPREAD 18-24" | ATTRACTS BUTTERFLIES | ATTRACTS SONGBIRDS | DEER RESISTANT

This long awaited coneflower blooms two weeks earlier than other coneflowers and has a longer bloom time from late June to the first frost! It is also the first coneflower to bloom 100% the first year from seed. The large, 4-6" wide rose-pink flowers have distinctive raised cones in the center with rough, lance shaped foliage. Prairie Splendor™ has a compact growth habit that is perfect for containers on the patio, or in both prairie and cottage gardens. In the winter, the dried seed heads provide food for songbirds and add architectural interest to the landscape. This award winning coneflower was the 2007 Fleuroselect Gold Medal winner. It thrives in rich, well-drained soil in full sun to part sun and is hardy in Zones 3-8.
