DEER
RESISTANT

The outstanding lacy golden-yellow foliage makes this compact evergreen an excellent choice as a colorful accent. Sea of Gold[®] retains its golden color in winter better than other gold-tipped varieties. Although this is a dense, multi-stemmed shrub, the golden foliage adds a fine, delicate texture to the landscape. It is ideally planted in rock gardens, as a groundcover, or used as a foundation plant. This juniper is deer resistant and thrives in full sun in moist, well-drained to dry soil. Apply a 2-3 inch layer of mulch or organic matter to conserve moisture and improve the soil. It is hardy in Zones 3-9.
