FULL SUN TO  
PART SHADE

HEIGHT  
6-8'

SPREAD  
8'

ATTRACTS  
BUTTERFLIES

ATTRACTS  
HUMMINGBIRDS

WINTER  
PROTECTION

I think the striking and beautiful blooms of Rhododendrons cannot be duplicated by another plant. Roseum Elegans has small, dome-shaped flower clusters that start out rosy-illiac and fade to pink. The flowers attract butterflies and hummingbirds to the garden. This medium-size shrub is a vigorous grower that will benefit from a thorough watering before the ground freezes in fall. Use a burlap windbreak or evergreen branch mulch to protect the tender foliage from the drying winter sun and wind. Apply a 2-3" layer of mulch or organic material to conserve moisture and insulate the roots. Rhododendrons thrive in full sun to part shade in cool, moist, acidic soil, but will tolerate alkaline clay soil. Hardy in Zones 4-8.
