BUTTERFLIES

WOODLAND  
GARDENS

I think Viburnums are excellent landscape plants, and this compact selection is perfect for smaller yards. Lacy, flat-topped flower clusters bloom in spring and attract butterflies. The creamy-white flowers are followed by an impressive display of vivid-blue, pea-sized berries in late summer; a favorite food of song birds. The berries make a striking contrast against the shiny green foliage which darkens to burgundy-purple in fall. Ideally used as a low hedge, to dress up shrub beds, or in the back of the border for seasonal interest. Viburnums attract a variety of wildlife and are perfect for woodland and habitat gardens. Blue Muffin® is a resilient and care free, slow growing variety that thrives in full sun to part shade in most soils and exposures. Apply a 2-3" layer of mulch or organic material to conserve moisture and improve the soil. Hardy in Zones 3-9.
