BORDERS

I find the shorter stature of this Weigela makes a valuable foundation plant that fits well in smaller landscapes. Dark Horse has generous clusters of magenta-pink flowers that stand out boldly against bronze foliage with striking lime-green veination. The trumpet-shaped flowers attract hummingbirds to the garden and the dense, spreading structure attracts birds. Plant as good coverage in the front of shrub borders or on banks. To shape this shrub, prune gently after it blooms in spring. Apply a 2-3" layer of mulch or organic material to conserve moisture and improve the soil. This moderate grower thrives in full sun in well-drained soil. Hardy in Zones 4-8.
