

## **Additional Information for Planting Vegetables in Various Locations**

Hello,

Thanks so much for joining me for the Succession Planting & Crop Rotation webinar on March 26<sup>th</sup>. I focused on planting dates for the southern part of WI and mentioned you would need to adjust for your location. As promised here are some resources for those of you gardening outside of WI and who shared your location. MY Midwest Gardener's Guide also provides planting information for states throughout the Midwest that you may find helpful

Thanks again for joining me!

Melinda
